

2.11 Weatherboard Panel

Weatherboard Panel Material Specifications		
Property	0.42 BMT	Notes
Total Coated Thickness	0.47	TCT
Mass / Unit Length (kg/m)	ZINCALUME®	1000 / (m/Tonne)
	COLORBOND®	
Mass / Unit Area (kg/m ²)	ZINCALUME®	1000 / (m Mass/profile width)
	COLORBOND®	
Minimum Yield Strength	G550	Base Steel Designation
Coating Class	AZ150	Minimum Coating g/m ² of Zinc - Aluminium
Coverage (mm)	265	
Tolerance	Sheet Length ±10mm Cover	
Thermal Expansion	2.9mm average per 5m at 50° C change	

Table 2.11.A Weatherboard Panel Material Specifications

Fielders Weatherboard Panel is an attractive and durable system of interlocking panels incorporating completely concealed fixings, plus a versatile range of accessory trims. It is admirably suited to a wide range of uses including fascias, infill panels, wall claddings, screens and fences. Fielders Weatherboard Panel may be fixed horizontally or vertically in internal or external locations.

Cover and Span

Each panel covers 265mm in continuous lengths. The maximum recommended span is 600mm. For lengths over six metres contact your local Fielders Office.

Installation Procedure

1. If fixing from a point, rivet the panel to the soaker flashing.
2. If fixing from a straight edge, use starter clips on the first sheet.
3. Hook the second panel into the top of panel one and fix the stud work with fixing clips at each stud (600mm maximum centres).
4. Repeat step three until completed. Cut each sheet on edge to fix the apex if required.
5. Fix flashings as required.

Note: A foot mould may be required in some applications.

Material and Finish

Fielders Weatherboard Panel is available in a new light weight high strength zinc coated steel or in the proven COLORBOND® finish.

Accessories

It is best that flashings are measured to order for each job to ensure a neat fit. Maximum length of flashings is eight metres in standard colours of COLORBOND®. All other colours are available P.O.A. based on volume.

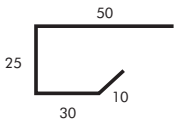

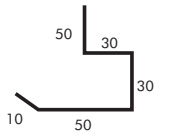

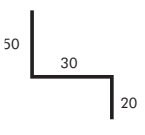

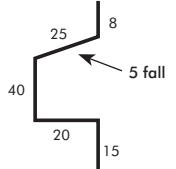

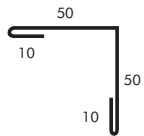

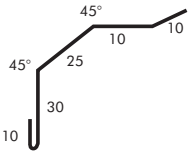

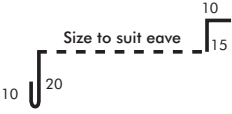

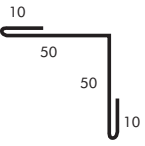

Weatherboard Panel Flashings & Details	
Cap  Product Code: WB01	Foot Mould  Product Code: WB02
Top Window Flashing  Product Code: WB03	Window Sill Mould  Product Code: WB04
Side Window Flashing  Product Code: WB05	Internal Corner Mould  Product Code: WB06
Eave Mould A  Product Code: WB07	Eave Mould B  Product Code: WB08
External Corner Mould  Product Code: WB09
